# MetaTrader 4 Audit Software

Using MetaTrader 4 Audit Software, you can easily check all orders for one or several MetaTrader 4 platform(s), which were opened at manual trade or by the advisor.

You can clearly trace, when the order was submitted, when it was accepted by the server, and when the broker accepted the order.

We can also see tics in the neighborhood of this order. And You can easily define manual intervention by broker: non market quotations etc.

The program requires no installation. Just run the exe file. Window should open.

In the left corner of the window will appear list of all MetaTrader 4 terminals installed on your computer. Select the desired terminal or terminals and run MetaTrader 4 double-clicking the mouse on terminal (s) name.

Warning: In order for the beginning to monitor your orders, you must run the terminal(s) from the program.
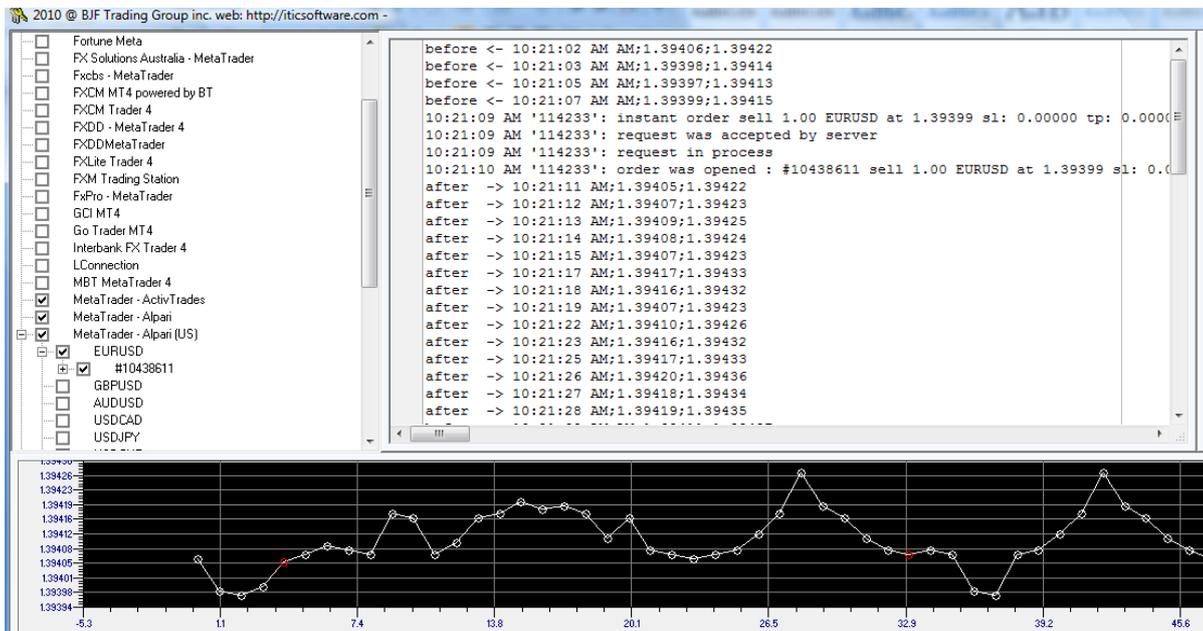

For Example:

10:21:09 AM '114233': instant order sell 1.00 EURUSD at 1.39399 sl: 0.00000 tp: 0.00000

10:21:09 AM '114233': request was accepted by server

10:21:09 AM '114233': request in process

10:21:10 AM '114233': order was opened : #10438611 sell 1.00 EURUSD at 1.39399 sl: 0.00000 tp: 0.00000

You can view all information about order and all ticks around order. Information is presented both in numerical and in graphical form. Order on the graph is marked by red circle. Ticks around the order are marked by white circles.

Also by means of our program we can easily check the LOG file, all errors and so on. We can review all tics on the chosen currency. So, if you face non-market quotations or manual intervention – you can address your request to the broker or NFA, asking for explanations, having supported your claims by LOG files.

We hope this program will become an integral part of toolkit of each trader and will help you to analyze work of your system and amend in time. We also hope it will help to choose the broker rightly.

Your success depends only on the professional approach to trade and constant analysis of winning and unprofitable transactions.
